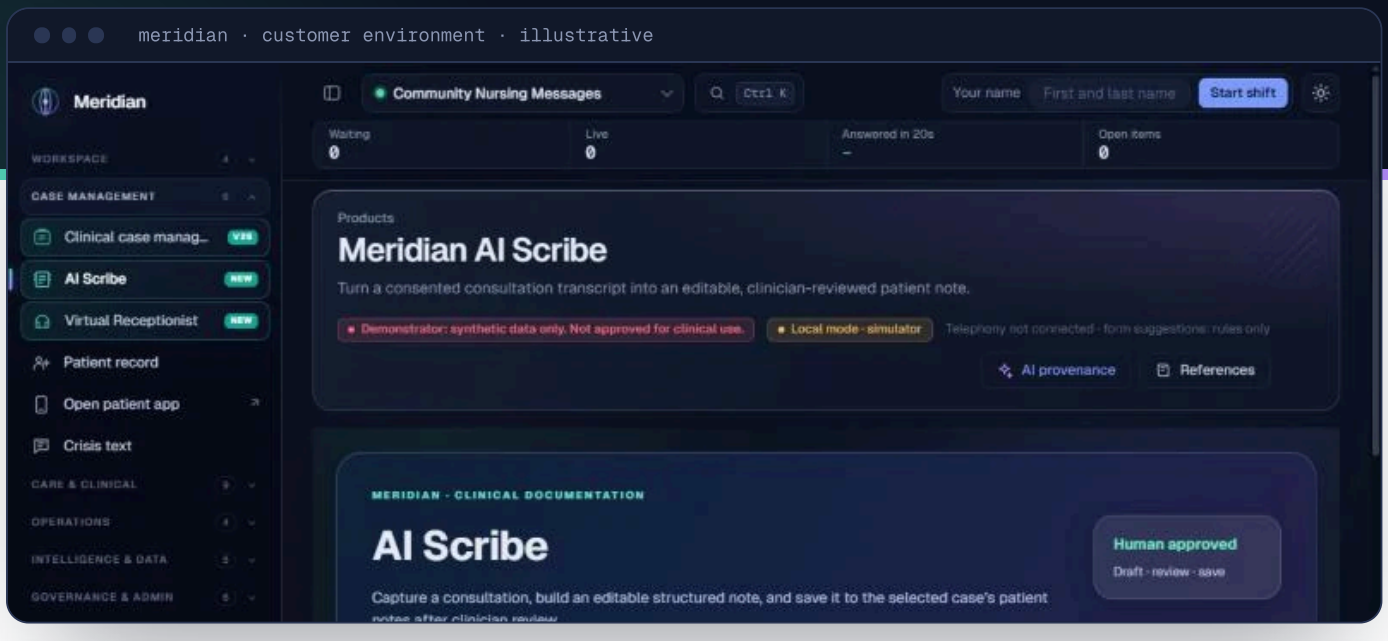
CARE COORDINATION

Meridian AI Scribe

Consultation words in. A clinician-reviewed note out.

Turns a consented consultation transcript into editable structured fields and a note the clinician verifies before it is saved to the selected case, with consent and provenance kept on the record.



THE PROBLEM

- Clinicians lose hours a week to documentation.
- Generated notes can look complete while missing what was said.
- Consent and model use are rarely recorded with the note.

WHAT IT DOES

Three transcript routes
Browser speech, pasted transcript or a finished Meridian call.

Consent first
Consultation consent before capture; model use has a separate opt-in.

Note templates
Primary care, SBAR, wellbeing and follow-up structures.

Editable fields
Problem, history, findings, assessment, plan, medications, allergies.

Transcript-grounded
The default organiser preserves statements; gaps stay blank.

Deliberate save
Draft or clinician-reviewed note, attached to a chosen case.

HOW IT WORKS

01 — Choose context
Select the case and template.

02 — Capture
Confirm consent, then transcribe.

03 — Draft
Local organiser or opted-in model.

04 — Verify
Correct every field.

05 — Save
Draft or reviewed note.

CONTROL BUILT IN

- [x] Clinician review required to save
- [x] No raw audio retained
- [x] Separate consent for model drafting
- [x] No diagnosis, prescribing or EHR write-back

Runs on the Reimea control layer

Every Reimea product shares one control layer, so a new agent arrives already governed. Deployed in your own cloud environment, under your keys.

- Identity & access
- Policy per task
- One AI gateway
- Named human approval
- Tamper-evident record
- Controlled learning

WHO IT IS FOR

Primary care, urgent care and community clinicians, and the digital and clinical-safety teams that support them.

MEASURE THE PILOT

- Documentation time per consultation
- Fields corrected at review
- Notes saved same session
- Clinician satisfaction

Baselines and targets are agreed with you in the Reimea pilot scorecard before the pilot starts.

Current status. Local product demonstrator in Meridian v25 using synthetic data. Live integrations and clinical-safety evidence are scoped with each customer.

WORKS WELL WITH
