

CARE COORDINATION

Meridian Care Pathways

An agreed follow-up. A clear, owned timeline.

Turns a care-team follow-up plan into owned milestones, due dates and progress that staff record, so planned follow-up actually happens and is visible beyond the individual case.

THE PROBLEM

Follow-up plans live in notes and are easily missed.

Milestones have no owner or due date.

Completion is assumed rather than recorded.

WHAT IT DOES

Template-led creation

After-episode, health-review and medication follow-up templates.

Owned context

Reference, service, owner and target date on every plan.

Milestone timeline

Planned steps with due-date context.

Recorded progress

Staff record status and notes; nothing auto-completes.

Admin templates

Configure steps, offsets and kinds per service.

Queue integration

Open milestones feed the Transitions queue.

HOW IT WORKS

CONTROL BUILT IN

- ✓ Care-team controlled, not prescriptive
- ✓ Named owner on every pathway
- ✓ Progress recorded by people
- ✓ No treatment decisions made

Runs on the Reimea control layer

Every Reimea product shares one control layer, so a new agent arrives already governed. Deployed in your own cloud environment, under your keys.

WHO IT IS FOR

Care-coordination, long-term-condition and community teams running structured follow-up.

MEASURE THE PILOT

Baselines and targets are agreed with you in the Reimea pilot scorecard before the pilot starts.

Current status. Local product demonstrator in Meridian v25 using synthetic data. Live integrations and clinical-safety evidence are scoped with each customer.

WORKS WELL WITH

Start with one workflow. Make the decision measurable.

A 45-minute briefing covers your workflow, the product and its limits, and a sensible next step. Bring the people who own the decision.
