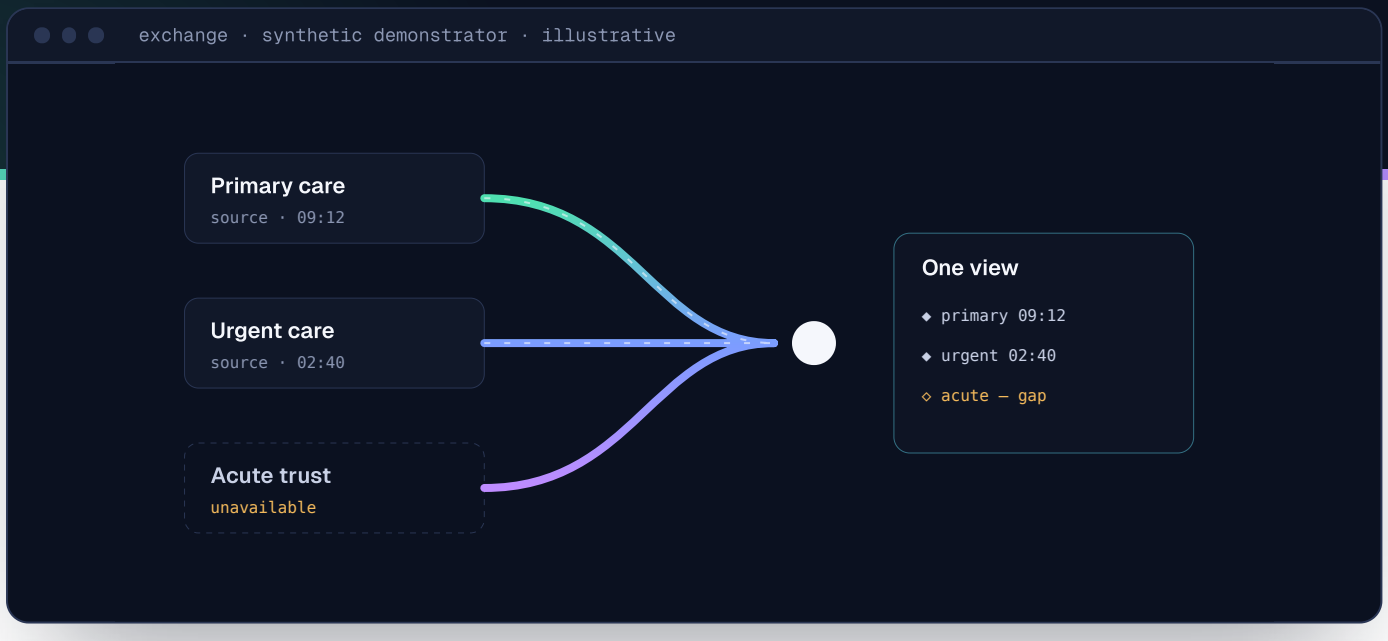
RECORDS

Reimea Exchange

The source matters. So does what is missing.

A source-attributed shared-care-record design: one view across participating organisations where every item keeps its source and time, and unavailable sources are shown, never hidden.



THE PROBLEM

- Shared records hide where information came from.
- An empty view is mistaken for no history.
- Access purpose and identity checks are bolted on later.

WHAT IT DOES

Provenance
Source organisation, identifier, clinical date and retrieval time.

Visible gaps
Unavailable sources and conflicts shown explicitly.

Identity review
Patient matching with human review where uncertain.

Purpose of use
Access tied to professional, organisation and pathway.

FHIR R4 basis
Standards-based interface design.

Separate boundary
A Meridian login never opens an Exchange record.

reimea

Reimea Exchange

HOW IT WORKS

01 Context
Professional, purpose, pathway.

02 Identity
Resolve the patient match.

03 Request
Ask permitted connectors.

04 Assemble
Source-attributed view.

05 Review
Gaps and conflicts visible.

CONTROL BUILT IN

- Purpose-of-use on every access
- Gaps never hidden
- Separate from Meridian access
- Human review of uncertain matches

Runs on the Reimea control layer

Every Reimea product shares one control layer, so a new agent arrives already governed. Deployed in your own cloud environment, under your keys.

- Identity & access
- Policy per task
- One AI gateway
- Named human approval
- Tamper-evident record
- Controlled learning

WHO IT IS FOR

Participating health and care organisations, information governance and integration teams designing a bounded shared-record pathway.

MEASURE THE PILOT

- Sources available per view
- Uncertain matches reviewed
- Time to assemble context
- Clinician trust in the view

Baselines and targets are agreed with you in the Reimea pilot scorecard before the pilot starts.

Current status. In development: synthetic demonstrator. Production identity, connectors and clinical-safety evidence are established per pathway.

WORKS WELL WITH

Meridian Clinical Case Management
Care coordination

Knowledge Control
Governance

Meridian Intelligence
Agents & operations

Start with one workflow. Make the decision measurable.

A 45-minute briefing covers your workflow, the product and its limits, and a sensible next step. Bring the people who own the decision.
