

GOVERNANCE

Knowledge Control

Govern what your AI agents are allowed to know.

Controls what AI may retrieve, who owns it and when it needs review. Content is staged, checked for conflicts and approved by a named person before any agent can use it, and every answer can show which version it relied on.

THE PROBLEM

Anyone can upload a document and the AI starts quoting it.

Nobody owns the guidance agents rely on.

Out-of-date policy keeps reaching customers and patients.

WHAT IT DOES

Accountable ownership

Source, owner, classification, service and scope.

Staging

Import and inspect before anything is usable.

Conflict checks

Duplicate and possible-conflict signals.

Lifecycle decisions

Approve, reject, deprecate or restore, with versions.

Scoped retrieval

Product scopes decide which agents may use it.

Review dates

Content resurfaces for review on schedule.

HOW IT WORKS

01

Import

Parse and stage content.

02

Inspect

Owner, conflicts, scope, dates.

03

Decide

Approve, reject or deprecate.

04

Retrieve

Eligible passages with versions.

05

Maintain

Revisions return to staging.

CONTROL BUILT IN

- ✓ Approval required before retrieval
- ✓ Review-by date on every source
- ✓ Version shown with every answer
- ✓ Revisions return to staging

Runs on the Reimea control layer

Every Reimea product shares one control layer, so a new agent arrives already governed. Deployed in your own cloud environment, under your keys.

● Identity & access

● Policy per task

● One AI gateway

● Named human approval

● Tamper-evident record

● Controlled learning

WHO IT IS FOR

Content owners, approvers, information governance and service governance teams accountable for what AI says.

MEASURE THE PILOT

Sources with named owner

Content past review date

Answers citing current version

Time to publish a change

Baselines and targets are agreed with you in the Reimea pilot scorecard before the pilot starts.

Current status. Meridian product module. Deployment, integrations and assurance are validated with each customer during discovery and pilot.

WORKS WELL WITH

Meridian Knowledge

Agents & operations

Meridian Guardian

Agents & operations

Meridian AI Scribe

Care coordination

Start with one workflow. Make the decision measurable.

A 45-minute briefing covers your workflow, the product and its limits, and a sensible next step. Bring the people who own the decision.
