

CARE COORDINATION

Meridian Home

Care at home, with an accountable team watching.

Coordinates home-care episodes, patient check-ins and consented observations, with flags reviewed by staff who choose the next action. Missing readings stay visible, never mistaken for reassurance.

THE PROBLEM

Remote observations arrive with no one clearly responsible.

Silent escalation rules make staff nervous.

A missing reading looks the same as a normal one.

WHAT IT DOES

Episode ownership

Owner, pathway context and planned review date.

Consent-aware data

Observations read only with active provider consent.

Local boundaries

Teams configure limits and inspect advisory flags.

Review queue

Flags and patient updates in a staff-owned queue.

Patient check-ins

Patients view the plan and ask for contact.

Missing-data visibility

Absent or stale readings stay visible.

HOW IT WORKS

01

Agree

Owner, plan, hours, review date.

02

Consent

Confirm provider and category.

03

Receive

Observations and check-ins.

04

Review

Staff interpret flags.

05

Follow up

Record and coordinate.

CONTROL BUILT IN

- ✓ No silent escalation
- ✓ Consent checked per data category
- ✓ Flags are advisory
- ✓ Staff choose every action

Runs on the Reimea control layer

Every Reimea product shares one control layer, so a new agent arrives already governed. Deployed in your own cloud environment, under your keys.

Identity & access

Policy per task

One AI gateway

Named human approval

Tamper-evident record

Controlled learning

WHO IT IS FOR

Virtual-ward, hospital-at-home and community teams supporting patients remotely.

MEASURE THE PILOT

Flags reviewed within target

Check-ins with follow-up

Missing-observation alerts

Episodes closed by the team

Baselines and targets are agreed with you in the Reimea pilot scorecard before the pilot starts.

Current status. Local product demonstrator in Meridian v25 using synthetic data. Live integrations and clinical-safety evidence are scoped with each customer.
