

CARE COORDINATION

Meridian Outcomes & Prevention

Measure the process. Keep the meaning clear.

Reviews referral flow, home-care participation and recorded coordination activity with source and reporting window visible on every measure, so improvement work starts from honest numbers.

THE PROBLEM

Outcome claims rest on measures nobody can reproduce.

Reporting windows and denominators change silently.

Process data gets mistaken for clinical effect.

WHAT IT DOES

Reporting windows

30, 90, 180 or 365 days, chosen explicitly.

Referral flow

Received, ready, waitlisted and booked status.

Completeness indicators

Complete-for-review, booked and incomplete percentages.

Home-care participation

Episodes and patient check-ins over the period.

Coordination activity

Completions, deferrals and active pathways.

Interpretation boundary

Missing data and coverage kept visible.
